

ANANY SAXENA

3D GENERALIST / FREELANCE 3D ARTIST

CONTACT – (+91) – 9001561133 | saxena12anany@outlook.com

SUMMARY

I'm a passionate 3D enthusiast skilled in modelling, rigging, UV mapping, and lighting. With over 3 years of experience, including 1.8 years professionally, I offer creativity and technical skills for every project. I thrive in teamwork and enjoy exploring unconventional approaches. Proficient in industry-standard software, I have created various 3D models that reflect my commitment to quality and innovation. My collaborative spirit and drive to push boundaries make me an asset to any creative team.

SKILLS

TECHNICAL SKILLS

- 3D Modelling (High/Low Poly)
- Sculpting (ZBrush, Blender)
- UV Mapping & Unwrapping
- Texturing (PBR, Hand-Painted)
- Rigging & Skinning
- Animation (Basic/Intermediate)
- Lighting & Rendering (V-Ray, Arnold, Marmoset, Blender Eevee, Lumen)
- Game Engine Integration (Unity, Unreal Engine)
- Baking Maps (Normal, AO, etc.)
- Photogrammetry
- Shader Development (Basic)

CREATIVE SKILLS

- Composition & Scene Design
- Colour Theory
- Concept Visualisation
- Environment Art
- Prop Design
- Stylised & Realistic Art Styles

SOFT SKILLS

- Problem-Solving
- Team Collaboration
- Communication
- Time Management
- Adaptability - Attention to Detail

EXPERIENCE

02/2026 – PRESENT | 3D DESIGNER

JOG INNOVATIONS – DEHRADUN, INDIA

- Created game-ready 3D assets for real-time web-based configurators, focusing on clean topology, UV efficiency, and performance
- Built and optimised assets for real-time rendering workflows, ensuring compatibility with engine and web pipelines (GLB/Three.js)
- Designed modular asset systems and material workflows, enabling dynamic customization and scalability.
- Collaborated with cross-functional teams to maintain visual quality and performance standards across assets.
- Transitioned from freelance to full-time role based on consistent delivery and production reliability.

11/2026 – 02/2026 | 3D DESIGNER

JOG INNOVATIONS – REMOTE

- Delivered production-ready 3D assets for an interactive apparel configurator.
- Established asset pipeline workflows, including modelling, UV mapping, texturing, and export for real-time applications.
- Defined visual quality benchmarks and optimisation standards for scalable asset production.

11/2024 – 03/2025 | FREELANCE 3D ARTIST

MARINE PIPELINE PROJECT – REMOTE

- Built large-scale environment assets, including city layouts and offshore platform structures.
- Created and animated mechanical and industrial assets, ensuring functional accuracy and clean topology.
- Integrated assets into Unreal Engine, focusing on scene assembly, scale consistency, and performance optimisation.
- Contributed to real-time visualisation workflows for industrial simulations.

07/2024 – 05/2025 | FREELANCE 3D ARTIST

JSW (By PENTASAFE)– REMOTE

- Created high-quality industrial safety walkthroughs, animations and protocol visualizations.
- Delivered optimised scenes for real-time playback using Blender, iClone, and Twinmotion.
- Executed character animation, scene layout, lighting, and rendering for production outputs.

11/2024 – 03/2025 | FREELANCE 3D ARTIST

KAMICS TECHNOLOGIES – REMOTE

- Created architectural and industrial environment assets, including factory elevations.
- Handled end-to-end asset development: modelling, UV mapping, texturing, lighting, and rendering.
- Produced animated walkthroughs with attention to scale, composition, and realism.

Including Internship Experience from May 2023 to August 2023.

- Created game-ready assets, including vehicles and props, using full PBR workflows.
- Worked with Unity pipelines, focusing on optimisation, low-poly baking, and rigging.
- Created stylised characters with hand-painted textures and cloth simulation.
- Used Marmoset Tool bag & Substance Designer for baking, material creation, and look development.
- Improved asset workflows from Blender → CC4 → Engine, ensuring performance and visual quality.

11/2022 – 03/2023 | 3D GENERALIST

IMMERSIVE TECHNOLOGIES – JAIPUR, INDIA

- Created game and marketing assets for real-time and cinematic applications.
- Worked across modelling, texturing, animation, and FX using Blender, Maya, and Unity.
- Built previsualisation scenes using proxy meshes for rapid concept validation.
- Improved asset quality through topology optimisation and efficient texturing workflows.

EDUCATION AND TRAINING

BIRLA INSTITUTE OF TECHNOLOGY, MESRA [JAIPUR – OFF CAMPUS] BACHELOR OF SCIENCE – ANIMATION AND MULTIMEDIA

GPA: 8.930 CGPA

- Volunteer: TechVibes Fest.
- Creative 3d designer for TechVibes stage.

CERTIFICATION

CGMA – PROPS FOR GAMEPLAY

- Learned to design and create optimised, game-ready props with strong silhouette, function, and storytelling for real-time game engines.
- Gained hands-on experience in UV unwrapping, baking, and texture painting using industrystandard tools like Maya, Substance Painter, and Marmoset Toolbag.

UDEMY – 3D VIDEO GAME ENVIRONMENT ART BOOTCAMP

- Built immersive game environments using strong blockouts, composition, and lighting techniques in Unreal Engine 5, leveraging Lumen for real-time rendering.
- Created high-quality props using photogrammetry and Zbrush, and enhanced scene presentation with decals and portfolio-ready workflows.

PROJECTS

RENEGADE – COMPREHENSIVE PROJECT | DEGREE PROJECT – BACHELOR'S

- Learned Script Writing and Direction for Games.
- Created Game props and interior environment for the project.
- Learned the animation.

- Created multiple assets while learning UDIM workflows used in games for detailed texturing at low resolution.
